

FX Lift Magnets – Above the rest for a reason

PRODUCT FEATURES

1) Handle

- On/Off handle only needs to rotate 90°, versus 120° or 180° in other magnets making it easier to turn On.
- Fits down in containers, C-channel, I-beam webbing with less handle interference
- Can be operated with a single hand without tipping over like others
- The handle is a replaceable part

2) Name Plate (label)

- Durable, scratch resistant, metal name plate, not a sticker.
- Name plates are recessed below the edge of the magnet for protection
- One side contains the script instructions/warnings while the other side is pictorial to demonstrate the operation and capacities
- Labeling complies with ASME B30.20 & BHT1 2018 standards
- Name plates are a replaceable part

3) Lifting Bail

- Fixed lifting bail allows the operator to hook the magnet with a single hand
- One-piece forged bail
- The bail is a replaceable part

4) Magnet Design

- Magnetic circuit and magnetic poles on each of the FX magnet types are uniquely designed and engineered to give maximum strength and stability for the primary application, i.e., lifting pipe, angle iron, thin material, hot parts, etc.
- No need for custom pole shoes
- Magnetic face and steel body is Nickel-plated to prevent corrosion

5) End Plates

- Die cast aluminum end plates
- End plates are a replaceable part

6) Top Plate

- Solid one-piece machined aluminum top plate
- No paint to chip off
- No information, numbers or symbols to wear off

7) RFID Enabled

- Magnet contains an RFID chip with a unique digital serial number that now can be read with current cell phones.

Replaceable Spare Parts: Handle, Name Plates, Lifting Bail and End Plates are all replaceable.
With all replaceable spare parts, your magnet will look brand new.
